PROFESSIONAL SUMMARY

Software Engineer with experience in **Java, Spring Boot, microservices, cloud technologies (Azure), and data-driven solutions**. Proven track record in building scalable enterprise systems, **developing AI-powered analytics platforms, and delivering digital transformation initiatives**.

SKILLS

Programming & Development: Java, Spring Boot, JPA, Python, SQL, REST APIs, Design Patterns

Data Engineering & Analytics: MongoDB, Pandas, NumPy, ETL Pipelines, Data Cleaning, Data Visualization, Sentiment Analysis, AI

DevOps & Tools: Jenkins, Git, JIRA, CI/CD, Postman, Azure, Kubernetes, Microsoft Office

Certification: Microsoft Azure Data Fundamentals, Microsoft Azure AI Fundamentals, LLM Engineering – Master AI & LLM(Udemy)

EDUCATION

MS in Information Systems Management, W.P.Carey School of Business, Arizona, USA

Aug 2023 - Aug 2025

Modules: Digital Strategy, Business Strategy Analysis, Data Visualization, Project Portfolio Management, Cybersecurity

Bachelor of Engineering, Computer Engineering, Pune University, Pune, India

Jun 2016 - Jul 2020

Modules: RDBMS, Object-Oriented Programming, Agile Methodologies, Software Development Life Cycle (SDLC)

PROFESSIONAL EXPERIENCE

Software Engineer, *Boozevilla*, Washington, USA

Jun 2024 – Aug 2025

- Engineered an end-to-end analytics pipeline using **Python, MongoDB**, and **NLP** to collect, process, and analyze unstructured social media data from Facebook, X (Twitter), Reddit, and Instagram, enabling actionable business insights through automated workflows.
- Applied **Hugging Face Transformers, VADER**, and **advanced NLP techniques** for sentiment analysis, text classification, entity extraction, and structured insight generation from large volumes of semi-structured user-generated content.
- Developed, tested, and deployed **RESTful Spring Boot microservices** to automate product synchronization between Boozevilla and Lord of the Drinks, reducing manual errors by 30% while ensuring real-time inventory consistency through API integration.
- Built scalable backend services using **Java, Spring Boot, JPA, and MySQL**, designing optimized database schemas with indexing, **schema versioning**, and **query optimization** to support high-performance processing and reliable transactions.

Associate Technical Engineer, *Kyndryl Pvt. Ltd.*, Hyderabad, India

Oct 2021 – Jul 2023

- Owned the end-to-end **Software Development Life Cycle (SDLC)**, including requirements analysis, system design, **Java** development, **JUnit**-based testing following **Test-Driven Development (TDD)** practices, code reviews, and deployment.
- Collaborated with cross-functional engineering, QA, and product teams to debug, optimize, and enhance **Spring Boot** microservices that scaled to process and manage **10M+ patient and clinical records** while improving application performance and reliability.
- Developed, maintained **RESTful APIs** with a strong focus on **data validation**, **performance optimization**, **exception handling**, and reliable integration with enterprise systems to ensure secure, scalable, and high-availability application services.

Associate Technical Engineer, *IBM Pvt. Ltd.*, Pune, India

Jun 2021 – Oct 2021

- Developed and maintained **Java** modules and **SQL** scripts, identifying and resolving performance bottlenecks through code optimization, query tuning, and debugging, improving overall system scalability, maintainability, and application performance.
- Participated in **peer code reviews**, **Agile sprint ceremonies**, backlog refinement, and collaborative debugging sessions, contributing to higher code quality, faster feature delivery, and the successful development of enterprise healthcare applications.

PROJECTS

AI Knowledge Assistant using RAG, *Personal Project*

In Progress

- Developing an **AI-powered document assistant** using **Python, Large Language Models (LLMs)**, and **Retrieval-Augmented Generation (RAG)** to retrieve, summarize, explain, and generate responses from documents through a conversational interface
- Leveraging **vector embeddings**, **semantic search**, and **prompt engineering** for intelligent document retrieval.

Youtube Trending Video Analytics ETL Pipeline, *Personal Project*

Sept 2024 - Nov 2024

- Developed a **Python-based ETL** pipeline using **SQLAlchemy** to ingest, transform, and load multi-region YouTube trending video data into PostgreSQL, leveraging **ThreadPoolExecutor**, duplicate detection, and bulk inserts for efficient ingestion.

Valorant Community Analytics, *W.P.Carey School of Business*

Jan 2024 - Mar 2024

- Built a **Python-based analytics pipeline** using the **Reddit API (PRAW)** to analyze Valorant community sentiment and gameplay trends through NLP, exploratory data analysis, and interactive Power BI dashboards.

E-commerce Recommendation System, *W.P.Carey School of Business*

Oct 2023 - Dec 2023

- Built an end-to-end e-commerce recommendation system using **Python, SQL, RFM analysis, K-Means clustering**, and **Market Basket Analysis (Apriori)** to segment customers, generate personalized product recommendations, and identify cross-selling opportunities to increase average order value.

Task Management, *Pune University*

Jul 2019 - April 2020

- Built a Spring Boot Task Management application using H2, JPA, CRUD REST APIs, Git, and automated data initialization.
